# PRATEEK BANGAR

## FULL STACK WEB DEVELOPER

## Work Experience

### Full Stack Intern - Ypsilon IT Solution

December 2022 - May 2023

I have done trainee part of Ypsilon, my daily work was to create frontend using React.js and Backend Using Node.js and Express. My primary project for the company was NoteBook Web-App which was an assessment that I setup from scratch.

### MERN Stack Developer - SMT Labs

July 2023 - Now

PROJECT : Thiridroc.ai

My Daily responsibilities as a **Backend Developer**

- Developing and maintaining robust APIs for seamless communication.
- Managing and optimizing database systems for data integrity.
- Ensuring security measures and encryption.
- Optimizing performance and conducting testing and debugging.
- Creating and maintaining comprehensive documentation.

PROJECT : Pool Store

My Daily responsibilities as a **Frontend Developer**

- Designing and implementing responsive user interfaces.
- Using React.js/Next.js for efficient frontend development.
- Ensuring cross-browser compatibility.
- Implementing responsive design for various devices.
- Managing version control with Git.

## PERSONAL PROJECTS

### VibeLand - Social Media Web-App

Vibe Land is a social media web-app created using MERN Stack, just like in other social media website user can search and follow their friend using their username and check out their profiles, like their post and all.
